

Venue

The Summer School will take place at the Department of Economics, Via Vivaldi 5, Genova.

The Department is located in the old port area (Darsena), very close to the "Galata Museo del Mare". It is about 10 minutes walking distance from the main railway station Genova Piazza Principe and 20 minutes walking distance from the center of the town (Piazza De Ferrari).

The Department of Economics is connected to the other railway station of Genova Brignole by underground, Darsena stop or by bus. Please check the AMT web site. (<https://www.amt.genova.it/amt/>).

Lectures will be held by

Genova Summer School
of Political Economy

First edition

3th-7th June 2019

Department of Economics
Aula Fieschi
Via Vivaldi 5, 16126 Genova

Description

The Genova Summer School of Political Economy is open to PhD students and scholars of economic, political and social disciplines.

It has two fundamental objectives. First, it aims to provide an illustration of the basic theoretical schemes of Political Economy. Professor **James Snyder** from Harvard University will provide morning lectures on these issues. Particular emphasis will be given to the voting and bargaining models as well as to the developments of the models of Meltzer and Richard and of Grossman and Helpman.

The second objective of the course is to show how Political Economy theoretical schemes can be used to explain socio-economic facts that do not find satisfactory explanations within the traditional economic approach. To this aim, afternoon sessions will be devoted to the presentation and discussion of invited and selected applied contributions.

The course is English taught.

How to apply

Participation to the Summer School is free of charge, but formal registration is required by following the instructions on the Phd in Economics and Political Economy website at the following address:

www.economia.unige.it/phd-summer-school-2019

Applications must be received no later than **11 May 2019**. Those who wish to present their work during the panel sessions must submit the paper at the time of registration.

The scientific committee will examine the applications and decide the admission on the basis of the order of registration and the curriculum.

The maximum number of participants is set at 20 students and researchers. The Scientific Committee reserves the right to derogate on the basis of the number of applications received and the profile of the classroom.

The final list of participants will be communicated by **15 May 2019**.
